Professional Summary

Aspiring software developer with a strong foundation in programming fundamentals, including Python, JavaScript, C++, and web technologies. Combines recent academic project experience in Computer Science with over six years of professional background in Technical Sales. Utilizes proven communication, team leadership, and client relations skills to bridge the gap between technical development and business needs.

Skills

Languages: Python, JavaScript, C++
Frontend: HTML, CSS, Tailwind, Bootstrap
Backend: MongoDB, Supabase
Technologies Tools & Platforms: Cisco Packet Tracer, GitHub

Work Experience

Jhing Industrial Supply October 2018 – January 2025
Technical Sales

- Providing excellent customer service and addressing any post-sales questions or concerns.
- Managed and trained a team of Sales Representatives.
- Negotiating contracts and closing sales deals.
- Prospecting for new customers and clients by making cold calls, sending emails, and networking.
- Consistently meeting or exceeding monthly/quarterly sales quotas and targets.

Education

Asian Institute of Computer Studies June 2018 – April 2026
Bachelor of Science in Computer Science

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Web Developing, Database, Network Security.

Project Work

- **SNAR Consultancy Corp. Website (2025):** Developed SNAR Consultancy Corp.'s website (2025) as part of a mini-thesis, focusing on innovative UI/UX strategies to enhance user experience using HTML, CSS, JavaScript, and PHP. Designed a responsive, interactive platform with intuitive navigation, dynamic elements, and backend functionality for form processing, ensuring optimal performance and accessibility across devices.
- **Cisco Network Project: Multi-Protocol Routing, VLAN Segmentation, and Security Hardening (2025):** Designed and implemented a secure enterprise network topology in Cisco Packet Tracer, configuring OSPF dynamic routing, VLAN segmentation, inter-VLAN routing, DHCP services, and static routing. Applied network security best practices including access control lists (ACLs) and switchport hardening to optimize traffic flow and protect against unauthorized access. This project demonstrated end-to-end network planning, troubleshooting, and multi-protocol integration in a simulated environment.
- **Re:Washify Website (2025):** Developed the official website for Re:Washify, an eco-friendly and inclusive social enterprise, focusing on translating a "double bottom line" mission into an engaging digital experience using HTML, CSS, and JavaScript. Designed a responsive, interactive platform featuring a custom dynamic shopping cart system, light-box product galleries, and smooth scroll animations, ensuring intuitive navigation, seamless user interactions, and optimal accessibility across all devices.
- **Sihay: Android-based Application Utilizing Neural Networks for Chicken Egg Fertility (2026):** Developed the "Sihay" system as part of a thesis project, focusing on integrating machine learning with IoT hardware to automate the sorting of candled eggs using Kotlin, TensorFlow Lite, and C++ (Arduino). Designed a locally networked Android application that communicates seamlessly with an ESP32 camera and motor controller via Wi-Fi and ESP-NOW, utilizing a MobileNetV2 computer vision model to classify egg fertility and instantly trigger physical servo mechanisms, ensuring real-time processing and reliable hardware-software synchronization.

Awards and Certificates

- **Top Sales Awards – Jhing Industrial Supply**
- **Emerging Technologies Workshop: Model Driven Programmability**
- **CCNAv7: Enterprise Networking, Security, and Automation**
- **Cybersecurity Essentials**
- **Python Essentials 1**
- **Python Essentials 2**
